RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 32 pages. OCLC Number: (OCoLC)122257553 Subject: Wildfires -- West (U. S.) -- Prevention and control -- Evaluation. Excerpt: . . . Research Paper FPL - RP - 634 management objectives will sometimes override the application of silvicultural objectives and assumptions of fuel hazard reduction treatments. The thinning treatments used in this paper to reduce fire hazard have an objective of either (1) moving the stand toward an uneven-aged condition or (2) moving the stand toward an even-aged condition. In addition, the objective they must be planned and assessed in terms of their specific of some treatments is to limit the amount of basal area re-locations, values of adjacent resources, proximity of adjacent fuels, and likely rates-of-spread and weather conditions at the time of burn. For forest types prone to wind throw, there is a further restriction on removal of basal area to reduce wind throw.
