In open-air classes every advantage should be taken of teaching arithmetic by means of measurements, i. e. large measurements in lower grades (t, 2, and 31 more minute measurements in higher grades. This work should be done, as far as practicable, by means of games and plays, competition, i-e., scoring, measuring between points out of doors, etc. The mental strain of arithmetic can be reduced greatly by using muscular sense rather than visual sense, especially in written arithmetic, e. g. blackboard work and exercises in counting, addition, subtraction, multiplication, division, incidental to exercise, games, and plays. Mental arithmetic should not follow a lesson in history, writing, drawing, or sewing. Writing and drawing.--These subjects should be taught, in the earlier grades, by means of large muscular movements rather than through the sense of sight. This should be done by large shoulder movements in forearm work on blackboard. The progression in drawing and in writing should be from the oblique straight lines to the ellipses, to the circles, and then to the vertical or horizontal strokes from which elements, squares, rectangles, and curves can be developed. Blackboard and sand trays offer the best means of teaching these subjects in the first two grades. Later, covered electric wires of short lengths can be used. This material can be bent easily into figures and letter shapes. No pencils, paper, pens, ink, or needles should be used in the kindergarten or first three grades. Writing and drawing are less...
